PROJECTS

Public Projects

Grosy– E-commerce Web App | Link

Bulid a user-friendly e-commerce web application that allows customers to browse products, add them to a shopping cart, and place orders. The platform features secure user authentication, product management, and a smooth checkout process. It supports both customer and seller views, enabling sellers to update products and manage inventory, while customers can track orders and manage their cart. The application is responsive and built with a modern UI for a seamless user experience   Feb - 2025

Coffee Day – Digital Menu Website | Link

Technologies Used: HTML, CSS, JavaScript
Created a Coffee Day is a standalone, responsive digital menu website crafted for a café. It features a clean, modern layout that highlights the café's details, categorized menu items, and an intuitive user interface. Visitors can easily browse the full menu, view item descriptions, and submit feedback through an interactive form. The site ensures a seamless and engaging experience across devices, enhancing customer interaction and accessibility.   Dec - 2024

RC World – Porsche | Link

Technologies Used: HTML, CSS
Created a standalone animated advertisement webpage to showcase the Porsche brand. Features smooth transitions, sleek design, and dynamic animations highlighting various Porsche models. Built with HTML and CSS for a modern, immersive browsing experience.   Nov - 2024

Company / Internal Projects

PowerBI Cashflow Application (Internal Project)

Technologies Used: React, Redux, Ant Design, Tailwind CSS
Developed a role-based cashflow management application that displays only assigned projects for users and offers admin controls for user and project management. Designed a responsive, intuitive UI to improve efficiency in project tracking and financial management.

CRM for TheBusStand (crm.thebusstand.com) (Company Project)

Technologies Used: React, Redux, Ant Design, Tailwind CSS

Built a customer relationship management system for thebusstand.com to manage users, bookings, and services. Designed a clean, responsive interface to streamline operations and enhance usability for admin and user roles.

TheBusStand.com – Bus Booking Portal (Company Project)

Technologies Used: React, Redux, Tailwind CSS
Developed a bus booking platform featuring route search, booking, and ticket management. Designed a responsive UI and implemented optimized state management to ensure fast, smooth performance across devices.
